

LONI Pipeline Training Neuroimaging Solutions

Cincinnati Children's Hospital Medical Center (CCHMC)

Presenters: Ivo D. Dinov, John D Van Horn, Petros Petrosyan

The LONI Pipeline environment is a free distributed workflow application that enables users to quickly create computational processing protocols, execute these as graphical workflows, monitor the state of their analyses, and broadly disseminate the detailed provenance of data and processing protocols. This workshop will provide hands-on training on remote Pipeline server installation, client-server interfaces, utilization of Grid resources using the distributed Pipeline computational infrastructure, design of new and modification of existent heterogeneous data analysis protocols, sharing of data and pipeline workflows, integration of imaging, demographic and meta-data. The organizers will provide a detailed training handbook and supplementary electronic media with all of the necessary software and test data

Who may be interested in this event?

Neuroimaging researchers, computational scientists, bioinformaticians.

Registration is now open!

The cost for the event is \$200 and space is limited to 40 registered participants.
